Best Practice - 2

Learning beyond Classroom: An online classroom practice in COVID-19. Title of the Practice: Learning beyond Classroom: An online classroom practice in COVID-19.

Practice: The COVID 19 pandemic has brought several challenges for both centre as well as state government authorities to prevent the outbreak from snowballing further and to lessen its advers effects on various social and economic sectors. For instance, this led to the indefinite closure of educational institutions across the country for an indefinite period and after passing one month of lockdown also was no announcement about timeframe on the resumption of classroom academics. The pandemic has significantly disrupted the higher education sector, which is an important determinant of a country's economic future. The closure of schools, colleges and universities is likely to interrupt the teaching for students around the world, the key assessment period and schedule of and admissions. This has caused a lot of stress not only for students but also for faculties and authorities. The departments of M. G. College Kharsia also took the opportunity to be well equipped with the various digital platforms in order to provide assistance and guidance to the learners regarding their semes tercourse. The various departments took near about 500 classes online. Professor P.K. Chetani was given the whole authorization due to having good knowledge of computer and also a well known authorization for over all look on the matter. To ensure the continuity of education despite the lockdown, higher education institutions have sought to use technology and offer online classes and learning experiences as a substitute for in-class time. Resources such as video lectures, podcasts, recordings and articles would be provided in order to transfer the main bulk of the necessary knowledge from teacher to student before each class. This then frees up time in class for teachers to support students in activities, lead discussions and facilitate engagement

Context: The Virtual mode teaching learning process inculcates among the students. The

- 1) Need for Flexibility to Students / Learners Centricity.
- 2) Increased student engagement in learning.
- 3) Enhanced teacher and student interaction.
- 4)Responsibility for learning.
- 5) Time management and flexibility.
- 6)Improved student learning outcomes.
- 7)Enhanced institutional reputation.
- 8) More flexible teaching and learning environment.17/1/22, 12:34 pm 71/76
- 9) More amenable for self and continuous learning.
- 10) Better opportunities for experiential learning

The practice: The IQAC took the pleasure to make the Virtual learning possible for all the UG and PG students. At the initial stage it a huge problem to make the UG learners available for the active Virtual learning. Being in the tribal and very low economic area it was not surely thought that most

of the learners might be having a smart phone in their homes. The UGC Blinded mode of learning booklet helped a lot inorder to make everything possible even in this very tribal area of institution to develop an LMS system for our institution. The major hurdle was to know how many or much were having a smart phone in their homes. As per our knowledge a year before the government of CG distributed smart phone to each student for developing the knowingness of the various online sources of study material. Thus the students of the UG first year, second year, and final year were given their sub-sections as we have only 100 students' limitation in the very initial stage of LMS system. Thus the students were given their student id and also a suitable and unique password also in order to make them join the class for their attendance. The teachers were given the charge to distribute the student id and the passwords to the students. Thus each teacher was given minimum 100students of UG in order to provide them their id and passwords. The parents were also given the parent id and password in order to check their children teaching learning process. The students were given online motivation to know how to join these online classes. Orientation program and also several other online programs were organized in order to make the learner easy to adopt the new method of teaching learning process. Within the one month time span the learners were so motivated that we thought to move to the maximum number of attendance as 500 students in the UG classes. Most of the classes were highly given priority and surprisingly maximum number of parents willfully bought new smart phones for their children. The institute has a unique system of undergoing the classes, A timetable was scheduled for the happening of the classes without any disturbance.

Evidence of Success: Students will have a benefit of learning even in the COVID 19 Pandemic era. They will no doubt increasingly take interest in this practice. They will positively regularly attend these classes despite their packed schedule of usual classes. Programmes and workshops are given belowin brief.

Government Manatma Gandhi P.G. College Kharsia, Dist -Raigarh (C.G.)

Problem encountered:

- i) Shortage of infrastructural facilities: A smart class room is needed to hold such classes. Need of Wi-Fi/Internet facilities will also play a big part in this scenario.
- ii) Shortage of manpower: Being a government college, we need to have the fulfillment of regular teachers by the orders of the government. Usually we also put on the guest faculty for the needed 10 months period in order to provide the needed guidelines to the students.

Resources required: Inter office training and need of computers, the projector machines and more manpower will help to strengthen this practice further.
